New work opportunities, emerging technologies, and changes in the way users conduct online searches have made an update of the business codes in the NECA member profile necessary. You can now further distinguish your company by designating new types of work, construction methods, and certifications on your profile. You can also specify whether your service offering for each type of work covers a particular sector—commercial/industrial/institutional, residential, or non-building—or any combination of the three.

We highly encourage that this information be reviewed and updated on each members’ company profile as our Find A Contractor search is one of the primary ways in which new customers find NECA contractors matching their needs.
